

## **Conflict of Minerals Policy Statement**

Elcon Precision, LLC stands for safeguarding human rights and is committed to ethical business practices and compliance with all applicable laws and regulations. In response to Dodd-Frank's regulation we are actively working to flow down Conflict of Minerals requirements down our supply chain to promote use of conflict-free 3TG raw resources (gold, tin, tantalum and tungsten).

We do request from our suppliers to provide compliance disclosure in a form of CMRT (Conflict Minerals Reporting Template) and monitor Responsible Materials Initiative website for updated information.

A handwritten signature in blue ink, appearing to read "Roy Barnes", is written over a horizontal line.
